For Simplest and Grandest Homes

An Edwards Metal Spanish Tile Roof

Costs No More Than a Good Tin Roof

Its scores of vital, practical advantages cost no more than common roofing, yet mean tremendous economy—it needs no repairs and outlasts several ordinary roofs because of its practically indestructible metal construction.

It is absolutely wind, weather, storm, fire and lightning proof.

Easy to apply. No soldering, no special tools—any ordinary mechanic can apply it. Interlocking system by which tiles dovetail into each other makes the roof absolutely water tight and provides for expansion and contraction perfectly—summer and winter. It is guaranteed non-breakable.

HOME-BUILDERS—Simply send us today the dimensions of your building and we will tell you by return mail exact cost of all material.

RYERSON HIGH SPEED FRICTION SAWS

Ryerson High Speed Friction Saws are designed for rapid cutting of steel shapes of all descriptions. These saws will cut different shapes in rapid succession without interchanging attachments or clamping the material. A 24" I-beam can be cut in 50 seconds. We manufacture this saw in various sizes with capacity to cut from the smallest to the largest sections rolled.

Intricate Cutting and Grooving Is Made Easy

by a

Huther Brothers Dado Head

The Huther Brothers Dado Head consists of two outside cutters and enough inside cutters to perform the required cut. These cutters may be used singly or in as many sets as desired.

We were the pioneers in producing this type of saw. Back of it is an experience of fifty years spent in making better saws better.

Order a Dado Head on approval. It can be returned at our expense if not satisfactory. Also let us send you copy of our catalogue.

"Allen"
SAFETY SET SCREWS
30% stronger than broached hollow screws

Sockets formed by the Allen process of cold-drawing, which increases the density of the steel around the socket-hole, and adds to the strength of the screw more than 30%. Even the smaller size "Allens" will stand all the strain that the best-made wrench can apply. All sizes in stock from ¼" to 1½"; any length, point or thread at no extra cost. Also Socket Head Cap Screws, Tap Extensions, Tire Wrenches and Pipe Plugs—Allen process. *Write for complete descriptive catalogue and price list.*

DINGS
MAGNETIC SEPARATORS

Manufacturers of magnetic pulleys, magnetic separators, etc.

Magnetic Pulleys for use where coarse material is handled, where the iron to be extracted is limited in quantity and where large capacity is important.

This equipment is used extensively to protect crushing and grinding machinery from breakage and damage due to "tramp" iron found in various kinds of material. It is also used for removing iron from material for other reasons, both mechanical and chemical.

Over 3500 satisfied customers.

SHEET METAL ARTICLES AND PARTS
MADE TO ORDER

"Here's a large Pressed Steel Auto Oil Pan which took the place of an expensive machined, aluminum casting."

Have you any aluminum, grey iron or malleable casting or wooden parts which we can probably develop into stampings or pressed metal parts?

The saving is great in many cases and the strength and utility of the part is much increased. The stampings can be made accurately, and since you can eliminate a good deal of expense of machining and fitting that is necessary with the use of castings, the advantage of using G. P. & F. precise, stamped parts is apparent.

We draw, stamp, punch, form, spin and blank the following sheet metals—Aluminum, Brass, Copper, Nickel Zinc, Monel, Sheet Steel, Tin-plate, Sheet Zinc, and we have facilities for electric spot and butt welding, hot tinning, hot galvanizing, japanning and porcelain enameling.

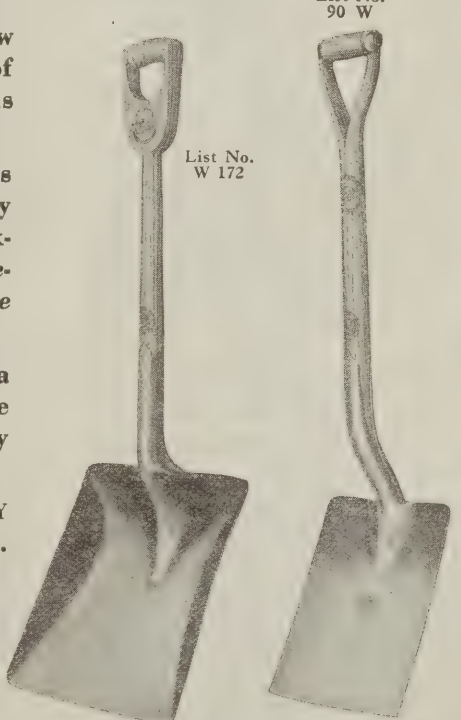
Tougher, Stronger, Lighter Shovels

List No. W 82

List No. 3 W 2



THE use of Mo-*lyb*-den-um Steel now makes possible the production of tougher, stronger, lighter shovels than were ever before possible.

Wood's Mo-*lyb*-den-um Shovels wear almost imperceptibly. They stand constant shocks without nicking, breaking or cracking. They *reduce* shovel costs because they *increase* shovel life.

Whether you buy a dozen or a thousand dozen of these shovels, we guarantee their *uniform* quality throughout.

KINNEAR ROLLING DOORS

for any kind of industrial building, large or small, are ideal.

The curtains are made of interlocking steel slats, hot galvanized by a special process, and if given a reasonable amount of care will last indefinitely.

Kinnear Doors are made to operate by one of three different methods: Manually, Mechanically, or Electrically.

Our Engineering Department will solve your door problems. Write for catalogue.

"Barnes-Made" Products

We have the equipment for making hundreds of thousands of parts for practically every type of mechanical device. Here's a summary of "Barnes-Made" Products:

If you use a brush-holder spring  or one of the  round type we make them. Spiral springs, straight  or coned  flat springs  of any description or size 

Torsion  springs, phonograph, clock or motor springs  all of these we make to your specifications from the better grades of material, whether flat high carbon steel, tempered round wire, music wire, brass, phosphor bronze or steel alloys.

And because we assemble so many springs with screw machine parts, we make these too—special  screws, knurled  pieces or any precision part

Pressed Steel Oil Pan for Automobile Motor

It will be worth your while to get into touch with us on any stamped or pressed metal articles or parts that you require, whether you are making them in your own plant or securing them on the outside. Our specialized knowledge and experience are at your service and we are confident that we can point out to you where it would pay you to get the benefit of our competition. Please note, too, that there may be some cast iron and cast aluminum parts or, indeed, wooden parts that you can have developed as a pressed steel proposition which will be cheaper than what you are now using, generally lighter in weight and usually superior in point of utility, because a stamping is more exact and more accurate, and requires less machining and less fitting for assembly.

TUBULAR BOILERS

Pusey & Jones Co., Wilmington, Del.
Quaker City Iron Works, Tioga & Richmond, Phila., Pa.

Elevated Steel Tanks for Sprinkler Service and for Industrial and Municipal Water Supply.

Steel Storage Tanks, from 500 to 80,000 Barrels Capacity, for All Kinds of Liquids.

DES MOINES TANKS TRADE MARK

We design, manufacture, and erect steel tanks of all kinds and sizes, and for every purpose.

Our three shops, located at Pittsburgh, Pa., Des Moines, Iowa, and Chatham, Ontario, Canada, are equipped to give prompt service on structural steel and steel plate work of every description.

A separate corps consulting and designing engineers is maintained at each plant. Des Moines crews have erected Des Moines products in every part of the world.

Des Moines products include everything that can be made from shapes and plates: Buildings; bridges; viaducts; wireless towers; steel storage tanks for every purpose; stand-pipes; stills; penstocks; smoke stacks, etc.

Write for catalog on the subject in which you are interested.

ACME TANK COMPANY

General Offices: 43 CORTLANDT STREET, NEW YORK

Acme Wooden Tanks for All Purposes

We manufacture wooden tanks for all purposes and are in a position to ship promptly to all parts of the country. In order to facilitate distribution we have established factories in New York, Illinois and California.

PRODUCTS

Wooden Tanks for water supply, chemical and color works, and all other purposes.

Wooden Tanks and Steel Towers for village or factory, fire protection, water supply, etc.

Tanks and towers built in accordance with specifications of National Board of Fire Underwriters or Associated Factory Mutual Fire Insurance Companies.

Lead Lined Tanks.

Round or rectangular tanks with copper, brass or Monel metal rods.

MATERIALS USED

The Acme Wood Tanks are built of California Redwood, Washington Fir, Cypress, Yellow Pine and White Cedar.

CAPACITIES AND SIZES

Made in all sizes, round and rectangular, ranging in capacity from 50 to 500,000 gallons. The cylindrical tank is the best form of construction and cheaper than any other. Rectangular and oval tanks are only used when special requirements make it necessary.

List showing sizes, capacities, hooping, weights, etc., sent on request.

40,000 GALLON TANK AND 100′ TOWER

CHEMICAL AND METALLURGICAL TANKS

Long experience has proven that California Redwood has greater acid resisting qualities than any other known material. California Redwood (Sequoia sempervirens) contains a natural preservative which makes it immune to the attacks of wood-boring worms or insects, common enemies to other species of wood, and makes it impervious to the destructive action of acid and alkaline solutions.

Redwood tanks are, therefore, natural containers for the many solutions used in the chemical and metallurgical industries. When properly seasoned Redwood shrinks less than any other wood. It is not affected by extremes of temperature. It is free from pitch and resinous matter. The stock used by this Company is thoroughly seasoned, clear, air-dried Redwood, free from sap, pitch, knots or other imperfections.

Practically every mining company in the West uses Redwood tanks for holding sulphuric and nitric acid solutions. The U. S. Government used hundreds of Redwood tanks for storage and manufacturing purposes in its various chemical and explosive plants during the recent war.

SHIPMENTS

Shipments can be made to any part of the country from our New York, California or Illinois factories.

GENERAL

Wood tanks are usually built of 2″, 2½″ or 3″ material, according to the size of tank and proposed use. For special purposes they are sometimes built of 4″, 6″ or heavier material. We carry all of these thicknesses in stock. 2″ material can ordinarily be used for capacities to 10,000 gallons.
